

My name is Katongo Musonda, an innovator and founder of Zednext Industries Ltd. We are revolutionizing cooking with a smart, energy-efficient stove, designed for households and commercial kitchens. ZEDNEXT smart stove utilizes 3 energy sources such as solar, regular grid electricity and gas; as well as leveraging artificial intelligence and other innovative hardware and software technologies to achieve precision cooking thereby optimizing energy consumption translating to 60% reduced energy consumption.

Partner with us to bring ZEDNEXT Smart stove to market and revolutionize the way people cook. Together, we can create a more sustainable future.
